# Introducing Multifunction Cardiogram™ Testing

 **Identifying coronary artery disease  
with the highest accuracy available.**

Premier Heart's Multifunction Cardiogram™ is a revolutionary advancement in cardiac diagnostics. In less than 10 minutes, the MCG™ measures the health of the entire cardiovascular system.

**MCG™ identifies underlying conditions 6-8 years in advance—often before patients even experience symptoms:**

- Coronary Artery Disease (CAD) in all stages, including early onset
- Microvascular Disease, a widespread problem for men and women left undetected by other methods
- Rhythm Disturbances, even before they are noticed by most patients
- Heart Stiffening before heart failure is a clinical entity
- Myocarditis (cases on the rise since COVID)
- Even low-level Occlusion with high sensitivity

**October  
18th and 19th**

**Forum Health  
Rochester Hills would  
like to offer this scan  
for a limited special  
price of \$500.**

This includes the scan appointment and a 15-minute follow-up appointment for an interpretation of the results.

Call our office at  
**248-844-1414**

to schedule your Multifunction Cardiogram™ scan today!
